🎓 EDUCATION

Bachelor of Science (B.Sc.) Computer Science

Federal University of Petroleum Resources, Effurun

2019 – 2025

CGPA: 4.04 / 5.00

📜 CERTIFICATIONS

- Virtual Assistant Certification — Career Crafters Academy
- JavaScript — SoloLearn
- Responsive Web Design — SoloLearn
- HTML & CSS — SoloLearn

PROFESSIONAL DEVELOPMENT

- Currently learning NestJS
- Passionate about scalable frontend architecture

PROFESSIONAL SUMMARY

Frontend Software Engineer with over three years of experience designing and building scalable, responsive, and user-centric web applications using React.js, JavaScript, Next.js, Tailwind CSS, and modern frontend technologies. Experienced in enterprise dashboards, Progressive Web Applications (PWAs), AI-powered platforms, REST API integration, and data visualization. Proven ability to translate UI/UX designs into performant applications while collaborating with backend engineers and product teams. Currently expanding backend expertise with NestJS to build robust full-stack applications.

PROFESSIONAL EXPERIENCE

Abia State Government House

Frontend Software Engineer

12/2025 – Present

Performance Management System (PMS)

- Designed and developed responsive administrative dashboards for statewide civil service performance management.
- Built interactive compliance reports and analytics using Recharts.
- Integrated multiple REST APIs for task management, employee assessments, and compliance monitoring.
- Developed the A-P Character Score module used for civil service merit evaluation.
- Worked closely with backend developers to build scalable and maintainable solutions.

Alert Abia

- Developed responsive public landing pages and operational dashboards.
- Built interfaces supporting emergency response and real-time location monitoring.
- Implemented remote alarm activation, SIM swap detection, and device management features.

Daily Task Application

- Developed executive dashboards for monitoring statewide productivity.
- Built a role-based task management system with six distinct dashboards, implementing tailored workflows, permissions, and analytics for Staff, HOS, HOD, Supervisor, Governor, and Super Admin users.
- Implemented Progressive Web App (PWA) support for offline functionality.
- Integrated APIs to display compliance metrics and task performance.

Samplex Web Solutions

Software Developer

2024 – Present

Green Energy Investment Platform

- Built a responsive investment platform for renewable energy assets.

- Interested in AI-powered applications
- Experienced in enterprise dashboard development

CORE EXPERTISE

- React.js Development
- JavaScript (ES6+)
- Responsive Web Design
- Dashboard Development
- Progressive Web Apps (PWA)
- REST API Integration
- UI/UX Implementation
- State Management
- Data Visualization (Recharts)
- Performance Optimization
- Git & GitHub
- Agile Collaboration

CORE TECHNOLOGIES

- React.js
- Next.js(Learning)
- Tailwind CSS
- Framer Motion
- Recharts
- Node.js
- Express.js
- REST APIs
- Supabase
- Git
- Vercel
- Postman

SELECTED ENGINEERING PROJECTS

Pension Fraud Detection System

In Progress

- Technologies: React.js, Tailwind CSS, Recharts
- Developing an AI-assisted pension audit platform for identifying fraud and payment anomalies.
- Building exportable reports, audit dashboards, and compliance analytics.
- Designing intelligent workflows for pension verification and fraud investigation.

SBLUXE – Luxury Jewellery E-commerce Platform

In Progress

- Technologies: React.js, Supabase, Tailwind CSS, Framer Motion, Recharts
- Developing a premium e-commerce platform for luxury jewellery sales.
- Building secure authentication and customer account management.
- Creating elegant, responsive interfaces with smooth animations.
- Implementing analytics dashboards to monitor sales and customer activity.
- Optimizing performance for desktop and mobile users.

Green Energy Investment Platform

- Technologies: React.js, Supabase, Tailwind CSS, Recharts, Framer Motion
- Developed an investment management platform for renewable energy projects.
- Built responsive dashboards and portfolio tracking features.
- Integrated secure authentication and data visualization.

Personal Portfolio Website

- Live: <https://samplexweb-portfolio.vercel.app/>
- Technologies: React.js, Tailwind CSS, Vite, Framer Motion
- Designed and developed a modern portfolio website showcasing projects and technical expertise.
- Optimized for SEO, accessibility, and performance.
- Deployed on Vercel.
