Professional Summary

Results-driven Frontend Developer with over 3 years of experience building high-performance, responsive web applications. Expert in architecting scalable interfaces using React.js, Tailwind CSS, and Vite. Deeply experienced in building offline-first Progressive Web Apps (PWAs) for environments with inconsistent connectivity. Proven ability to translate complex administrative and security workflows into seamless, user-centric digital experiences.

Technical Skills

Languages: JavaScript (ES6+), HTML5, CSS3, Node.js

Frameworks/Libraries: React.js, Express.js, Tailwind CSS, Vite, jQuery, Lucide-React, Framer Motion.

Databases: Supabase (PostgreSQL), MySQL

Tools & Platforms: Git/GitHub, VS Code, Figma, Vercel, Supabase Auth

Professional Experience

Software Developer | Abia State Government House

Performance Management System (PMS):

- Architected the frontend for a state-wide administrative platform, consuming complex RESTful APIs to manage task assignments and civil servants assessments for Abia State.
- Implemented dynamic growth charts and visualization tools using Recharts, seamlessly integrating with backend data to track staff performance across Head of Service, MDAs and Departments.

- Developed UI for a custom "A-P Character Score" grading system for civil service merit evaluation

Alert Abia Mobile Security:

- Developed a security landing page and tracking dashboard featuring remote device locking and real-time location updates.
- Integrated live tracking and security features like remote record, SIM-swapping detection and remote alarm triggers.

Nkuzi AI:

- Led the frontend development of an AI-driven language tutor, focusing on maintaining conversational state and a smooth, accessible UI for interactive learning.
- **Data Systems:** Streamlined the digitalization of high-volume government records, focusing on form management and data integrity.

Daily Task App | Frontend Engineer

- Engineered the frontend architecture for an executive-level productivity tracking platform using React, Vite, and Tailwind CSS.
- Developed interactive, data-dense dashboards to visualize statewide compliance and productivity metrics, integrating complex API responses into responsive UI components.
- Implemented Progressive Web App (PWA) features to ensure reliable performance and offline data access in environments with inconsistent connectivity.
- Collaborated with backend developers to structure and consume government data projects, effectively translating complex data sets into actionable administrative insights.

Software Developer | Simplex Web Solutions

Full-Stack Green Energy Investment Platform (Demo)

- Engineered a complete trading interface for green energy assets using React and Supabase, focusing on real-time data visualization and secure transaction flows.
- Designed a high-fidelity dashboard to track energy production, portfolio value, and market trends using Recharts.

Portfolio Website

- Designed and deployed a personal portfolio showcasing web projects.
- Implemented responsive layouts and accessibility best practices.
- Optimized for 100% lighthouse performance scores and SEO best practices.
- Leveraged Git for version control.
